Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 12 November 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 7-8,43 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Farrell (6,233,414).

With respect to Claims 7, Farrell teaches the displaying step in figure 4B @ S220, S230, the receiving step in figure 4A @ S110 and the transmitting step in figure 5A @ S350 and column 4, lines 56-64, the processor, memory and list of sequences in his claims 1-8. With respect to Claim 8, Farrell teaches the receiving and generating steps in figures 4A-4B and column 2, lines 64-67 and column 3, lines 1-5. With respect to Claim 43, Farrell teaches the determining and automatically updating steps in figures 4A-4B.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 9-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Farrell in view of Ebner.

With respect to Claims 9-10, Farrell teaches all the claim limitations except that the set of one or more includes two or more and the receiving and transmitting steps. Ebner teaches that the set of one or more includes two or more in column 2, lines 1-7 and the receiving and transmitting steps in figures 2 and 3A-3D. It would have been obvious to one of ordinary skill in the art to include two or more media types and the receiving and transmitting steps of Ebner in to the invention of Farrell to "adapt to a wide variety in efficient manner" as taught by Ebner in column 1, lines 15-19. With respect to Claim 11, Farrell teaches all the claim limitations except for transmitting the various paper sources and ranges in a single print request. Ebner teaches transmitting the various paper sources and ranges in a single print request in his claim 15. It would have been obvious to one of ordinary skill in the art to transmit the various paper sources and ranges in one request because "there is often demand for selected pages in a set to incorporate ...features such as ...differing paper types, sizes..." as taught by Ebner in column 1, lines 23-25.

5. Claims 12-13,44 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ebner in view of Farrell

With respect to Claim 12, Ebner teaches the selecting steps where the first, second and third paper sources and page ranges are different in column 5, lines 35-42(see also figures 3A and 3C-3D) and the transmitting step in figure 3B. Ebner teaches all the claim limitations except for the determining step. Farrell teaches the determining step in

Art Unit: 2854

figures 4A-4B. It would have been obvious to one of ordinary skill in the art to incorporate the determining step of Farrell into the invention of Ebner to "customize the ready indication" as taught by Farrell in column 1, lines 33-34. With respect to Claim 13, Ebner teaches the receiving and generating steps in figures 3A-3D and his claim 15. With respect to Claim 44, Ebner teaches all the claim limitations except for determining and automatically updating steps. Farrell teaches the determining and automatically updating steps in figures 4A-4B. It would have been obvious to one of ordinary skill in the art to incorporate the determining and automatically updating steps of Farrell into the invention of Ebner so that operators "can receive exactly the status information they require..." as taught by Farrell in column 1, lines 33-34.

Response to Arguments

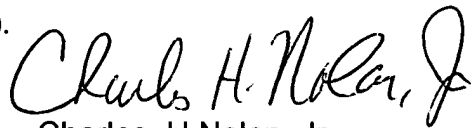

6. Applicant's arguments, see arguments, filed 11-12-04, with respect to the rejection(s) of claim(s) 7-13 under 35 U.S.C. 103 over Ebner in view of Daughton have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Farrell.
